EXPERIENCE

Senior Backend Engineer, Northwind Payments (Mar 2021 - Present)

- Designed and built the card-authorisation service in Go, handling 3,500 requests per second at peak.
- Cut p99 checkout latency from 900 ms to 240 ms by moving fraud checks to an async queue (Kafka).
- Led a team of 5 engineers through the migration from a monolith to 12 services on Kubernetes.
- Introduced contract testing between services, reducing integration incidents by 40%.

Backend Engineer, Brightline Logistics (Jun 2017 - Feb 2021)

- Built the shipment-tracking API in Node.js and TypeScript, used by 200+ retail partners.
- Moved reporting queries to a PostgreSQL read replica, removing nightly timeouts.
- Mentored 3 junior developers.

Junior Developer, Pixel Forge Studio (Sep 2015 - May 2017)

- Maintained the PHP booking platform and wrote its first automated test suite.

EDUCATION

BSc Computer Science, University of Manchester, 2012 - 2015 (First Class Honours)

SKILLS

Go, TypeScript, Node.js, PostgreSQL, Kafka, Kubernetes, Docker, AWS, gRPC
